

Natural Gas. *Efficient by Nature.*

The Blue Flame is as **Green** as it gets.

It's no surprise. Building with natural gas is true **green** building. Home buyers and renters want homes that are comfortable and appliances that will save them money and be good to the environment. Natural gas is the fuel source that does it all.

Give home buyers and renters what they want.

60%

site the availability of natural gas as a key driver in their decision to purchase or lease a home.

Building the homes that consumers demand makes them easier to sell or lease. With energy costs on the rise, buyers and renters alike take pleasure in knowing that the cost of enjoying their homes can be greatly reduced simply by having more efficient appliances.

Consumers know that natural gas products provide a superior level of comfort and convenience. That's why they're preferred by more than half of consumers residing in multifamily communities in Washington D.C.

To find out how to bring natural gas to your next multifamily project, contact our Engineered Sales Team at (703) 750-4844 or email engineeredsales@washgas.com.
